		Loss control	4 Hours
		Protection Evidence for Fire Cause Determination	4 Hours
		Fire Department Communications	4 Hours
		Fire Prevention & Public Education	4 Hours

First year applicants are encouraged to grandfather in training from previous years. However, for every year thereafter it is required that any and all firefighter training be taken during the calendar year for which you are applying.

Complete at least six (6) hours of continuing education each year until the volunteer firefighter completes a certification as Firefighter I or its equivalent.

Important Note: This form only certifies training hours completed for purposes of calculating tax credits applied for through COFT. While the course titles listed above may correspond with course or module titles used in the VFFP or FFI certification programs provided by Oklahoma State University Fire Service Training (OSU-FST), the above courses and modules may not meet minimum NFPA requirements for OSU-FST certification credit. All determinations of course or module equivalency for credit towards any OSU-FST certification program, and whether an OSU-FST certification examination may be challenged based upon completed course work, shall be made by OSU-FST. Questions regarding OSU-FST credit and examination challenges should be directed to OSU-FST at (800) 304-5727.
